Pollution Control Equipment

Pollution control equipment is designed to effectively manage contamination inside and outside of companies.

ProfilGate system ensures cleaning and disinfection of various wheels and shoe soles by removing dirt and helping to maintain workplace cleanliness.

KOHLHOFF

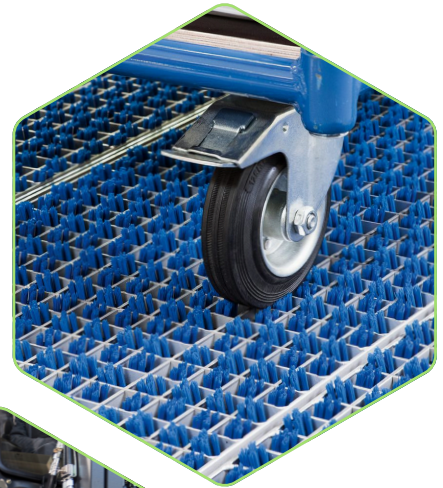

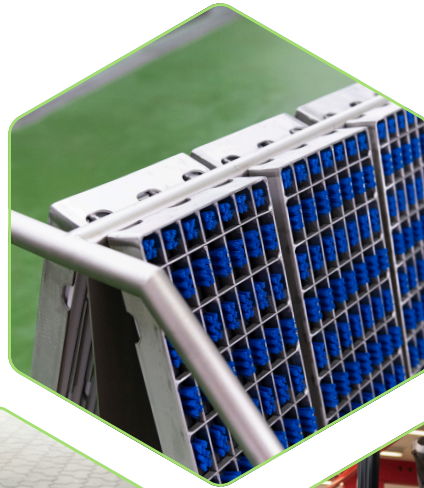

Kohlhoff pollution control equipment helps maintain high hygiene standards by controlling shoe cleaning, hand disinfection, and washing of boxes, containers, and knives in industrial and food production sectors. Pollution control equipment becomes important for businesses aiming to reduce the ingress of dirt and other contamination into the work environment.

ProfilGate Wheel Cleaning System

A great solution to this issue. A cleanliness zone is installed into the floor to clean the wheels of forklifts, pallet trucks, and other vehicles, as well as shoe soles. The cleaning happens while moving or walking over the system. Patented brushes can clean either dry or wet (with disinfectant solution).

- Mechanical cleaning with 3D motion
- Operates 24/7 without additional power source
- High cleaning and dirt collection efficiency – up to 80%
- Significantly improves indoor cleanliness
- Clean stored products
- Lower cleaning and washing costs
- Better health and higher safety
- Reduced risk of accidents

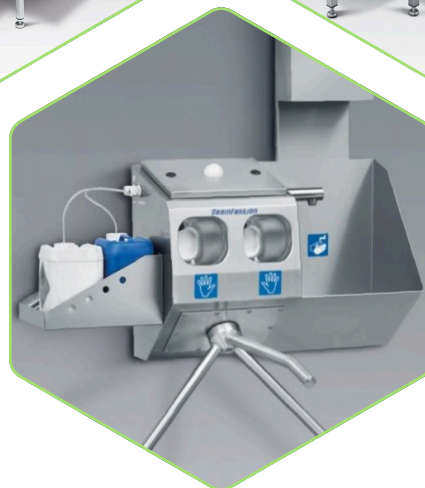

- ProfilGate Models:
 - ProfilGate b65
 - ProfilGate i55
 - ProfilGate b55
 - ProfilGate st55
 - ProfilGate i55 aqua

Kohlhoff Hygiene Equipment Technologies

Kohlhoff hygiene technology offers innovative solutions designed to meet the strictest hygiene standards. Their personal hygiene, food processing, and industrial equipment comply with international standards, help prevent contamination, and create a safe working environment. Reliability, efficiency, and durability – that's the Kohlhoff quality guarantee.

- Hygiene stations / entry control gates
- Shoe and boot cleaning equipment
- Automatic turnstiles
- Knife washing and sterilizing machines
- Box/container washing machines
- Boot dryers
- Sinks
- Industrial hand dryers
- Automatic dispensers

Hygiene Station CLEANCONTROL HD

Innovative station ensuring effective hand and footwear disinfection in one place. Ideal for the food industry and other hygiene-sensitive sectors.

Hygiene Station DLSO-SL + EK 400 WRT

Combined system for hand disinfection and footwear cleaning in one place. Efficient and compact solution for companies targeting top hygiene standards.

Hygiene Station DSC-HD + EK 800

Advanced system ensuring thorough hand disinfection and effective footwear cleaning. Ideal for companies prioritizing maximum cleanliness and safety.

Hygiene Station CLEANCONTROL SL

Provides reliable hand disinfection and sole cleaning in one spot. Perfect for companies needing high hygiene standards in limited space.

Hygiene Center HC-PRIMUS-2

Integrated system for hand disinfection and footwear cleaning in one station. Efficient solution for industrial companies aiming for top cleanliness.

KWM Container Washing Machine

Powerful and reliable system for washing various types of containers. Ensures thorough cleaning, saves time, and meets the highest hygiene standards.

High-Pressure Knife Basket Washer

Strong system for thorough high-pressure washing of knife baskets. Effective solution meeting strict hygiene standards in the food industry.

WR-ECO Sink

Reliable and energy-saving system for hygienic and efficient dishwashing. Ideal for companies aiming for high cleanliness with lower operational costs.

HANDI-2 COMPACT Hand Disinfection

Fast and reliable hand disinfection with low energy and water usage. Perfect for businesses needing high hygiene in limited space.

STT Boot Dryer

Efficient system ensuring uniform boot drying and moisture removal. Ideal for the industrial and food sectors, where cleanliness and comfort are essential.
